

respiFISH[®] Masterpanel

- The only MDx multiplex test specifically designed to identify bacteria directly from sputum and other respiratory fluids
- Make an impact where it matters most, differentiate clinically relevant pathogens causing pneumonia in just 30 min
- Save money by starting targeted antibiotic treatment earlier and improve patient outcomes

Coverage: Detects 95% of relevant bacteria

Simple: Works directly from patient material

Fast: Results available within 30 minutes

Conclusive: Detects single & multiple pathogens

Effective: Enables targeted antibiotic therapy
